Creating a Panopto Assignment Folder

To create an assignment folder, follow these steps:

1. Navigate to the Panopto assignment folder you want to create an assignment for.
2. Click on the "Add folder" button.
3. Enter a name for your folder and select the parent folder if necessary.
4. Under the "Assignment Folder" section, click on "Create Assignment Folder".

An assignment folder is a subfolder that shares its user list with its parent folder, but gives the users some additional privileges. Assignment folders enable viewer users in their parent folder to create and manage their own content, while preventing them from viewing other users' content that has not been explicitly shared or made public.

Creating an iSpace Assignment
The assignment activity module enables a teacher to communicate tasks, collect work and provide grades and feedback.

Students can submit any digital content (files), such as word-processed documents, spreadsheets, images, or audio and video clips. Alternatively, or in addition, the assignment may require students to type text directly into the text editor. An assignment can also be used to remind students of 'real-world' assignments they need to complete offline, such as art work, and thus not require any digital content.

Students can submit work individually or as a member of a group.

When reviewing assignments, teachers can leave feedback comments and upload files, such as marked-up student submissions, documents with comments or spoken audio feedback. Assignments can be graded using automatic grading, manual grading, or a combination of both.

Submission types

- File submissions
- Online text
Advanced grading: Panopto Example (Submissions)

Change active grading method to Rubric

Please note: the advanced grading form is not ready at the moment. Simple grading method will be used until the form has a valid status.
